

# Industrial Butterfly Valve

This high-performance butterfly valve is designed for industrial applications. It features a rotating disc for flow control and is equipped with an external actuator for precise operation.

## Product Overview

### High-Performance Industrial Valve

This high-performance butterfly valve is engineered for demanding industrial applications requiring precise flow control. Featuring a robust circular body and a reliable rotating disc mechanism, it is designed to manage fluid or gas flow efficiently within complex piping systems. Constructed from durable materials, the valve is built to withstand high-pressure and high-temperature environments while ensuring consistent, long-term performance.

## Technical Specifications

### Key Features

- Robust circular body construction
- Rotating disc for flow control
- High-pressure resistance
- High-temperature tolerance

Valve Type	Butterfly Valve
Operation	External Actuator
Suitable Media	Fluid, Gas
