

Industrial Butterfly Valve

This butterfly valve is designed for industrial applications requiring flow control. It features a circular disc-shaped body and a peripheral flange with bolt holes for secure connection.

Product Overview

Industrial Butterfly Valve

This industrial butterfly valve is engineered for reliable flow control and shut-off capabilities in demanding industrial environments. Featuring a robust circular disc-shaped body and a reinforced peripheral flange, it ensures a secure, leak-resistant connection. The distinctive reddish-orange coating on the disc provides enhanced durability and visibility, making it an ideal choice for heavy-duty piping systems.

Design & Construction

Key Features

- Circular disc-shaped body
- Peripheral flange design
- Multiple bolt holes for secure mounting
- Corrosion-resistant coating on disc

Connection Type

Flanged

Primary Application

Flow Control, Shut-off
