

Industrial Cable Joint

This cable joint is designed for secure and reliable electrical connections in industrial applications. It is constructed from durable materials, ensuring optimal conductivity and minimizing voltage drop.

Product Overview

High-Performance Industrial Cable Joints

These industrial cable joints are engineered for secure and reliable electrical connections across a variety of heavy-duty applications. Constructed from durable materials, they provide long-lasting performance and high resistance to harsh environmental conditions. The design ensures optimal conductivity and minimizes voltage drop, making them ideal for apparel, textile machinery, and diverse industrial equipment.

Technical Specifications

Cable Diameter Range	10-25mm, 35-50mm, 50-70mm, 70-95mm
Model Series	CJ03

Key Features

Performance Highlights

100 %

Conductivity Optimization

Core Benefits

- Secure and reliable electrical connections
- Minimized voltage drop for efficiency
- High resistance to harsh environments
- Durable material construction

Application

Target Industries

Apparel Machinery • Textile Machinery • Industrial Equipment

Environment	Harsh Industrial Environments
