

Industrial Cast Iron Centrifugal Water Pump

This industrial centrifugal pump is designed for high-volume water transfer. The durable cast iron construction ensures long-lasting performance in demanding environments.

Product Overview

High-Volume Industrial Water Transfer

This industrial centrifugal pump is engineered for high-volume water transfer applications across various demanding sectors. Constructed from durable cast iron, it offers exceptional longevity and resistance to wear and corrosion in industrial environments. Its efficient centrifugal design ensures consistent water movement for irrigation, water supply, and complex industrial processes.

Key Performance

Flow Capacity

0 High Volume
Flow Rate

Technical Construction

Housing Material

Cast Iron • Heavy Duty

Connection Type

Flanged Inlet and Outlet

Sealing Mechanism

Mechanical Seal

Mounting Base

Sturdy base for stable mounting

Applications

Primary Applications

- Industrial processes
- Water treatment systems
- Agricultural irrigation
- General water supply

Maintenance & Reliability

Serviceability

- Easily accessible components
- Designed for minimal downtime
- Simplified inspection access

Reliability Standards

Corrosion Resistant, Wear Resistant, Long-term Reliability
