

Industrial Caster Wheel with Side Brake

This industrial caster wheel is equipped with a side brake mechanism. It features a durable grey rubber wheel, zinc-plated steel frame, and threaded stem for secure mounting.

Product Overview

Industrial Caster Wheel Overview

This industrial caster wheel is engineered for high-performance mobility and reliable stabilization in demanding work environments. Featuring a robust grey rubber tire and a high-strength zinc-plated steel frame, it ensures smooth movement and excellent durability. The integrated side brake mechanism allows for quick and secure locking, making it an ideal choice for diverse industrial and professional applications requiring controlled positioning.

Technical Specifications

Wheel Material	Grey rubber
Frame Material	Zinc-plated steel
Mounting Method	Threaded stem

Features

Key Features	Side Brake, Industrial Grade, Smooth Rolling, Corrosion Resistant
