

Industrial Ceiling Fan

This industrial ceiling fan provides robust and efficient cooling for industrial and commercial environments. Its durable motor and aerodynamically optimized blades deliver powerful airflow, ensuring effective ventilation and energy efficiency.

Product Overview

Industrial Cooling Solution

The Industrial Ceiling Fan-ACF6001 is a robust and efficient cooling solution designed for industrial and commercial environments. Featuring a durable motor and aerodynamically optimized blades, this fan delivers powerful airflow for effective ventilation. Its sturdy construction ensures long-lasting performance in demanding conditions. Ideal for warehouses, factories, and large open spaces, this unit provides reliable and consistent cooling while promoting energy efficiency to help reduce operational costs.

Technical Details

Key Benefits

- Energy efficient operation
- Aerodynamically optimized blades
- Durable motor construction
- High-volume airflow

Model Number	ACF6001
Suitable Environments	Warehouse, Factory, Large Open Spaces, Commercial
