

Industrial Ceiling Fan, 36-48 Inch

These industrial ceiling fans provide efficient air circulation in large spaces. They feature durable construction and aerodynamically optimized blades for long-lasting performance and maximized airflow.

Overview

Industrial Air Circulation Solution

This industrial ceiling fan is engineered for efficient air circulation in large-scale commercial and industrial environments. Featuring a robust motor and aerodynamically optimized blades, it delivers high-performance airflow while maintaining low noise levels. The unit is finished with a powder coating for superior corrosion resistance and simplified maintenance.

Technical Specifications

Control Options

- Wall-mounted switch
- Remote control

Available Sizes	36 inch, 48 inch
Finish	Powder coated

Installation & Safety

Mounting Requirements	Requires secure mounting to a ceiling structure capable of supporting the fan's weight and operating forces.
Mounting Hardware	Standard downrod included for adjustable height

Key Features

Key Features

Corrosion Resistant • Aerodynamic Design • Industrial Grade • Low Noise
