

Industrial Ceiling Fan for Large Spaces

This industrial ceiling fan is designed for efficient air circulation in large spaces. Its durable construction and powerful motor provide a cost-effective solution for maintaining comfortable conditions in warehouses, factories, and commercial environments.

Overview

Industrial Air Circulation Solution

The ACF5601J is a robust industrial ceiling fan engineered specifically for efficient air circulation in large-scale environments. Featuring a durable construction and three aerodynamically optimized blades, this unit maximizes airflow while maintaining minimal noise levels. It is an ideal, cost-effective solution for warehouses, factories, and commercial spaces requiring consistent cooling and reliable performance.

Performance & Design

Number of Blades	3
Blade Technology	Aerodynamically optimized
Key Features	Robust Construction, Low Noise Operation, High Airflow Efficiency

Applications

Suitable Environments

- Warehouses
- Factories
- Commercial Environments

Maintenance & Installation

Maintenance Profile

Easy Installation • Low Maintenance
