

Industrial Ceiling Grid Structure with Lighting

Ceiling grid structures provide support in large industrial and commercial spaces. They feature a network of steel beams designed to hold utilities and lighting.

Product Overview

Industrial Ceiling Grid and Lighting Solution

This industrial ceiling grid structure is engineered to provide a robust framework for large-scale commercial and manufacturing facilities. Designed with a modular steel beam layout, it supports heavy-duty lighting and utility integration. The system facilitates organized cable and conduit management, ensuring a clean and functional overhead environment for high-performance workspaces.

Technical Specifications

Integrated Utilities

- Electrical Conduits
- Plumbing Systems
- Utility Routing

Structural Design

Modular Grid, Steel Beam Construction, Metal Deck Support

Lighting Configuration

Industrial Pendant Lighting

Application

Primary Applications

Manufacturing Plants • Warehousing • Commercial Facilities
