

Industrial Ceiling-Mounted Fan Coil Unit

This fan coil unit utilizes a brushless DC motor and electronic commutation control for enhanced power saving and energy efficiency. Sine PWM control ensures stable operation, while multi-stage or continuously variable transmission provides a wide speed adjustment range.

Overview

Industrial Ceiling-Mounted Fan Coil Unit

This industrial ceiling-mounted fan coil unit is engineered for high-efficiency climate control. Featuring a brushless DC motor with electronic commutation and Sine PWM control, it offers exceptional energy savings and stable operation. With a wide range of speed adjustments and intelligent temperature control, this unit provides precise environmental management for demanding industrial applications.

Technical Specifications

Temperature Control

Intelligent Controller • High Accuracy

Motor Technology	Brushless DC motor with electronic commutation
Control Method	Sine PWM control
Speed Adjustment	Multi-stage, Continuously variable
