

Industrial Centrifugal Fan for HVAC Systems

Industrial centrifugal fans are designed for refrigeration and ventilation applications. These fans feature a robust construction with a blue painted exterior and an orange painted interior.

Product Overview

Industrial Centrifugal Performance

This industrial centrifugal fan is engineered for high-demand HVAC and ventilation applications. It features a robust, corrosion-resistant dual-tone construction built for durability in harsh industrial environments. Designed with integrated square inlet and outlet ports, the unit ensures seamless duct connectivity and simplified system installation.

Technical Specifications

Connection Interface	Square
Primary Applications	HVAC Systems, Industrial Ventilation, Refrigeration

Design and Build

Material Finish

- Blue painted exterior
- Orange painted interior
- Corrosion-resistant coating

Design Highlights

High-Efficiency Motor • Durable Construction • Easy Duct Integration
