

Industrial Centrifugal Pump

This close-coupled centrifugal pump is designed for industrial applications. Its robust construction includes a volute casing and impeller optimized for efficient fluid transfer.

Product Overview

Industrial Centrifugal Pump

This close-coupled centrifugal pump is engineered for demanding industrial fluid transfer applications. Featuring a robust volute casing and precision-designed impeller, it delivers consistent efficiency and reliable performance. Its architecture is specifically optimized for chemical processing, water treatment, and general industrial environments while prioritizing easy maintenance.

Technical Specifications

Construction Features

- Robust volute casing
- High-efficiency impeller
- Simplified maintenance design

Pump Configuration

Close-coupled centrifugal

Application Areas

Primary Applications

Chemical Processing, Water Treatment, General Industrial Pumping
