

Industrial Centrifugal Pump

This centrifugal pump is engineered for efficient fluid transfer in industrial settings. Its robust construction uses corrosion-resistant materials, ensuring durability and consistent performance across a range of fluids.

Product Overview

High-Performance Industrial Pumping Solution

This industrial centrifugal pump is engineered for reliable and efficient fluid transfer in demanding environments. Designed with robust, corrosion-resistant materials, it ensures long-term durability and consistent flow rates. The unit features a dynamically balanced impeller and heavy-duty bearings to support continuous, high-performance operation across a variety of applications.

Technical Capabilities

Key Performance Indicators

1 Continuous

Operation Mode

Suitable Fluids

Water, Chemicals, Viscous Liquids

Construction & Design

Design Highlights

- Corrosion-resistant materials
- Dynamically balanced impeller
- Heavy-duty bearings
- Sealed motor for environmental protection
