

Industrial Centrifugal Pump

This high-pressure centrifugal pump is designed for industrial applications. It is suitable for fluid transfer and circulation tasks, delivering efficient and reliable performance.

Overview

Industrial Centrifugal Pump

This high-pressure centrifugal pump is engineered for demanding industrial applications. It features a durable stainless steel pump head and a robust electric motor, ensuring reliable performance for various fluid transfer and circulation tasks. Designed for efficiency, this unit provides a consistent solution for professional fluid management needs.

Technical Specifications

Model Series	SZ
Construction Materials	Stainless Steel Pump Head

Performance

Suitable Applications

- Fluid Transfer
- Fluid Circulation

Key Performance Indicators

1 Yes

High-Pressure Capability
