

Industrial Centrifugal Pump

Centrifugal pumps designed for various industrial applications. These pumps feature a robust construction with a red painted body, stainless steel flanges, and a black motor housing.

Product Overview

Industrial Centrifugal Pump

These industrial centrifugal pumps are engineered for reliable fluid transfer and circulation across a wide range of industrial applications, including packaging machinery. Featuring a robust construction, the design incorporates a durable red painted body, stainless steel flanges, and a protective black motor housing. This combination of materials ensures long-term performance and resistance in demanding operational environments.

Technical Specifications

Construction Materials

- Red painted body
- Stainless steel flanges
- Black motor housing

Available Models

TNF/130A, TNF/130

Applications

Primary Applications

Fluid Transfer • Circulation • Packaging Machinery • Industrial Processing
