

Industrial Centrifugal Pump

This centrifugal pump is designed for industrial applications. It features a vertically mounted motor for space-saving installation and is suitable for pumping clean, non-corrosive liquids.

Product Overview

Industrial Centrifugal Pump

This high-pressure, multi-stage centrifugal pump is engineered for demanding industrial applications. Its robust construction and vertically mounted motor design ensure a space-saving installation, making it ideal for facilities where footprint optimization is critical. It is specifically designed for the reliable transport of clean, non-corrosive liquids across various sectors.

Application & Usage

Suitable Applications	Water Treatment, Pressure Boosting, Industrial Processing
Fluid Compatibility	Clean, non-corrosive liquids

Design & Construction

Key Design Features

- Multi-stage configuration for high pressure
- Vertical motor mounting
- Space-saving footprint
- Robust industrial-grade construction
