

Industrial Centrifugal Pump

This centrifugal pump is designed for industrial applications requiring efficient fluid transfer. It features a durable cast iron construction and is suitable for handling water, chemicals, and oils in water treatment, chemical processing, and irrigation systems.

Overview

Industrial Centrifugal Pump

This robust centrifugal pump is engineered for demanding industrial fluid transfer applications, featuring durable cast iron construction for both the casing and impeller. Designed for high efficiency, it pairs a stable, high-flow hydraulic design with a high-efficiency electric motor to maximize energy savings. Its versatile architecture makes it an ideal solution for water treatment, chemical processing, and irrigation systems.

Construction & Materials

Casing Material	Cast Iron
Impeller Material	Cast Iron

Applications

Industry Use Cases

- Water Treatment
- Chemical Processing
- Irrigation Systems

Suitable Fluids	Water, Chemicals, Oils
