

Industrial Centrifugal Pump

This centrifugal pump is designed for industrial applications. It is suitable for pumping clean or slightly contaminated fluids, offering reliable performance and high flow rates.

Overview

Industrial Centrifugal Pump

This robust centrifugal pump is engineered for demanding industrial applications, featuring a horizontally split case design that simplifies maintenance procedures. Constructed with a durable cast iron casing and impeller, it is driven by a high-efficiency electric motor to ensure reliable performance. It is an ideal solution for water treatment, chemical processing, and HVAC systems, offering high flow rates and energy-efficient operation.

Technical Specifications

Design Features

- Horizontally split case
- Dynamically balanced impeller
- Mechanical seal
- Sturdy baseplate

Casing Material	Cast Iron
Impeller Material	Cast Iron

Performance & Application

Performance Highlights

1 Vibration-free
Operation

Fluid Compatibility

Clean Fluids • Slightly Contaminated Fluids

Suitable Industries	Water Treatment, Chemical Processing, HVAC Systems
