

Industrial Centrifugal Pump

This robust centrifugal pump is designed for industrial applications. It features durable construction with a blue base and a silver pump housing, powered by an electric motor for efficient fluid transfer.

Product Overview

Industrial Centrifugal Pump

This robust centrifugal pump is engineered for demanding industrial fluid transfer processes. Featuring a durable construction with a solid blue base and silver housing, it provides reliable performance in harsh environments. Powered by an electric motor, this unit is designed to maximize efficiency and longevity for professional applications.

Technical Specifications

Application Suitability

- Industrial Fluid Transfer
- Demanding Environments
- General Liquid Processing

Power Source	Electric Motor
Construction Materials	Blue Base, Silver Housing, Durable Metal
