

Industrial Centrifugal Water Pump

This centrifugal pump is designed for industrial applications. It features a robust cast iron construction with flanged connections for easy installation and maintenance.

Product Overview

Industrial Centrifugal Pump

This close-coupled centrifugal pump is engineered for demanding industrial applications, offering robust performance in heating, cooling, and water supply systems. Constructed with durable cast iron and featuring flanged connections, it is designed for straightforward installation and long-term maintenance efficiency. Driven by a reliable electric motor, this unit ensures consistent fluid movement across various operational environments.

Technical Specifications

Material	Cast Iron
Connection Type	Flanged
Design	Close-coupled

Applications

Suitable Applications	Heating Systems, Cooling Systems, Water Supply
-----------------------	--

Features

Key Features

- Robust cast iron construction
- Flanged connections for easy maintenance
- High-efficiency electric motor drive
- Suitable for diverse industrial fluids
