

Industrial Chain Sprocket

This chain sprocket is designed for efficient power transmission. It is suitable for use in machinery, vehicles, and other power transmission systems.

Product Overview

Industrial Chain Sprocket

This high-quality chain wheel is precision-engineered for efficient power transmission in demanding industrial environments. Designed for durability and reliability, it is suitable for a wide range of machinery and mechanical applications. The component is compatible with standard chain sizes and is manufactured to meet stringent quality standards for optimal performance and longevity.

Technical Specifications

Quality Standards

Industrial Grade • Precision Engineered

Model Number	80-8
Component Type	Industrial Chain Sprocket
Typical Applications	Machinery, Vehicles, Power Transmission Systems
