

Industrial Chain Wheel for Power Transmission

This high-quality chain wheel is designed for machinery and industrial power transmission applications. It is precision-engineered to ensure efficient and reliable performance in various chain sizes.

Product Overview

Industrial Power Transmission Component

This industrial chain wheel is a precision-engineered component designed to facilitate reliable power transmission in various machinery applications. Built for durability and smooth operation, it ensures efficient performance in demanding industrial environments. It is compatible with a range of chain sizes, making it a versatile solution for mechanical systems.

Technical Specifications

Number of Teeth	15
Bore Diameter	38 mm
Pitch Diameter	90.2 mm

Quality & Standards

Quality Grade

Industrial Grade • High Durability
