

Industrial Check Valve with Actuator

This industrial check valve is engineered for unidirectional flow control within pipelines. It features robust construction with flanged connections and an actuator for automated operation.

Overview

Industrial Flow Control Solution

This industrial check valve is engineered for reliable, unidirectional flow control in demanding pipeline environments. Featuring a robust, heavy-duty construction with secure flanged connections, it ensures long-term durability and installation integrity. The integrated actuator allows for seamless automated operation, providing the precise control necessary for complex fluid handling systems.

Technical Specifications

Operation Method

Automated • Actuated

Flow Control

Unidirectional

Connection Style

Flanged

Suitable Applications

Industrial Pipelines, Fluid Handling, Automated Systems
