

# Industrial Check Valve with Flanged Connection

This check valve is designed for industrial applications. It features robust construction with a flanged connection and prevents backflow in pipelines.

## Overview

### Industrial Check Valve

This heavy-duty check valve is engineered for demanding industrial applications requiring reliable backflow prevention. Featuring a robust construction with a secure flanged connection, it is built to withstand rigorous operational environments. The valve body is crafted from durable metal, such as cast iron or steel, and finished with a protective coating to ensure long-term resistance against corrosion.

## Technical Specifications

### Suitable Media

- Industrial Liquids
- Industrial Gases

### Key Features

Heavy-Duty • Backflow Prevention • Corrosion Resistant

<b>Connection Type</b>	Flanged
<b>Construction Material</b>	Cast Iron, Steel, Corrosion-Resistant Coating
