

Industrial Chemical Processing Unit

This chemical equipment is designed for various industrial applications. It features a robust construction with a rectangular enclosure and a control panel on top.

Overview

Industrial Chemical Processing Unit

This robust industrial chemical processing unit is designed for reliable performance in demanding environments. Featuring a durable rectangular enclosure and an integrated control panel, it offers precise monitoring and operational control for chemical mixing, storage, or processing tasks. Equipped with side handles for improved maneuverability, this unit is built to facilitate efficient industrial workflows.

Technical Specifications

Model Number	AV-200-PB-KIT
Equipment Type	Chemical Processing Unit

Key Features

Design Features

- Robust rectangular enclosure
- Integrated top-mounted control panel
- Indicator lights for process monitoring
- Side-mounted handles for maneuverability

Suitable Applications	Chemical Processing, Industrial Mixing, Chemical Storage
