

Industrial Chemical Product

These chemical products are used in various industrial applications. They are often packaged in bags and transported via conveyor systems within manufacturing facilities.

Product Overview

Industrial Grade Expandable Polystyrene

This industrial-grade expandable polystyrene is designed for high-performance applications in manufacturing and packaging. Engineered for consistent quality, it provides reliable structural properties suitable for diverse industrial processes. The material is optimized for efficient handling and integration into existing production workflows.

Material Properties

Material Type	Expandable Polystyrene (EPS)
---------------	------------------------------

Packaging & Logistics

Packaging Format	Industrial bags
Packaging Features	Industrial Grade, Bulk Packaging, Standardized
