

Industrial Cleaning Machine

This cleaning machine is designed for industrial use. The machine is intended for cleaning purposes within an industrial setting.

Product Overview

Industrial Cleaning Solution

The SQJ-120B is a robust industrial cleaning machine engineered for heavy-duty operational environments. Featuring a durable construction, this unit integrates precise internal components with an intuitive control interface to ensure efficient cleaning performance. Its design prioritizes reliability and ease of use for professional industrial maintenance tasks.

Technical Specifications

Key Components

- Internal Cylinder System
- Tubing Network
- Integrated Control Panel

Model Number	SQJ-120B
Design Highlights	Industrial Grade, Robust Construction, Control Panel Integrated
