

Industrial Cleaning Machine

This industrial cleaning machine is designed for robust cleaning performance. It ensures thorough and reliable cleaning across various industrial applications.

Overview

Industrial Cleaning Performance

The FR30QT-22 is a high-performance cleaning solution designed for demanding industrial environments. Engineered for efficiency and reliability, this machine delivers consistent results in various maintenance scenarios. Its robust construction ensures long-term durability, making it an essential asset for facility management and professional cleaning operations.

Technical Specifications

Model Number	FR30QT-22
Series Code	GXX
