Overview

Industrial Clear Housing Filtration

The Clear Captor is a high-efficiency cartridge filter designed for industrial fluid handling systems. Its transparent housing allows for immediate visual inspection of the filter element, enabling proactive maintenance and reducing downtime. Engineered for durability and ease of use, this unit is a reliable solution for maintaining fluid purity in hydraulic and fuel systems.

Technical Specifications

Max Working Pressure

5 BAR

Max Working Pressure

Dimensions

Dimension	Value
Base Length	170mm
Height	270mm

Connection Size	BSP 1"
Housing Material	Casting Aluminum

Features & Capabilities

Key Features

Ready to use • Replaceable cartridge • High efficiency • Small size

Compatible Cartridges

- Strainer Cartridge
- Impurities Paper Cartridge
- Water Absorption Paper Cartridge

Maintenance Components

Transparent housing, Drain valve
