

# Industrial Clothes Drying Machine

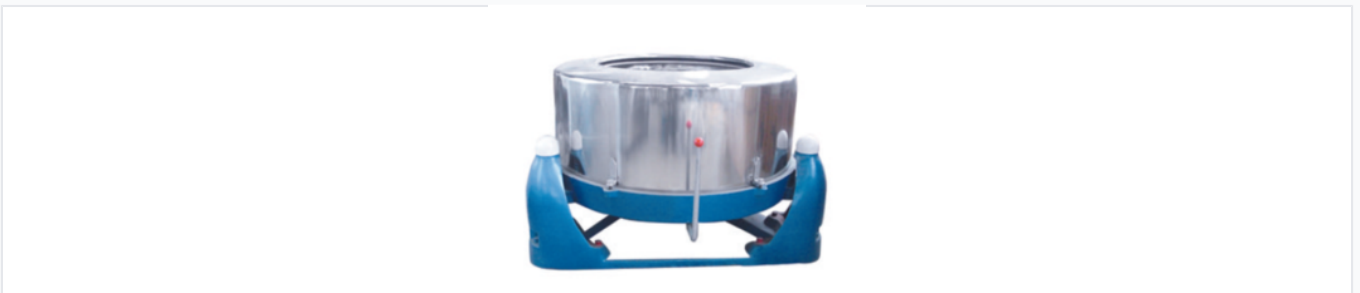

This industrial clothes drying machine is designed for efficient and high-volume clothes drying. It features a stainless steel drum and a user-friendly control panel for adjusting drying parameters.

## ADDITIONAL IMAGES

## Overview

### Professional Industrial Drying Solution

This industrial tumble dryer is engineered for high-volume commercial laundry operations in hotels, hospitals, and garment factories. Featuring a robust stainless steel drum and an automated control system, it ensures efficient and uniform drying with minimal noise. The machine is built for durability and safety, meeting international CE and ISO 9001 quality management standards.

## Key Features

### Main Features

- Automatic control panel for precise time regulation
- Automatic stop alarm upon cycle completion
- All stainless steel drum for durability and garment protection
- Large 180-degree opening door with toughened glass viewing window
- Triangle belt drive for smooth, low-noise operation
- Compact box cabinet structure to save floor space

Drum Material

Stainless Steel

## Technical Specifications

### Model Comparison

Model	Overall Dimensions (mm)	Drum Dimensions (mm)	Motor Power (kw)	Exhaust Fan Power (kw)	Heating Power (kw)
SWA801-10	700x1100x1340	!640x560	0.55	0.55	7.2
SWA801-15	900x1200x1500	!760x560	0.75	0.75	10.8

## Performance

### Operating Metrics

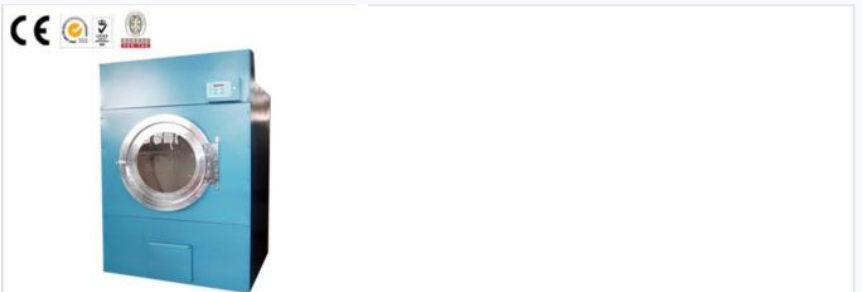

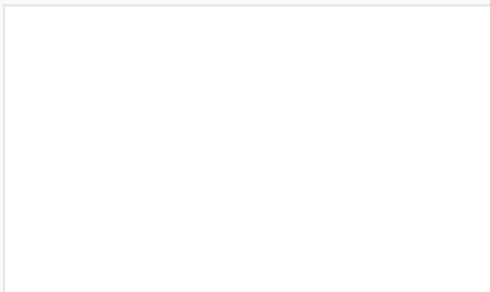

**46 r/min**

Rotation Speed

**0.6 MPa**

Max Steam Pressure

## Compliance & Quality

### Certifications

CE • ISO 9001

Safety Systems

Automatic Shut-off, Overload Protection, Toughened Glass, Stop Alarm
