Overview

Industrial Coarse Crusher

This industrial coarse crusher is designed as essential supporting equipment for fine crushing processes in the pharmaceutical, chemical, and foodstuff industries. Featuring a horizontal crushing structure, it utilizes a combination of fixed and rotating knives to process materials regardless of their viscosity, hardness, or fiber content. Built to GMP standards, the unit is constructed entirely from stainless steel, ensuring durability, low noise operation, and ease of cleaning.

Technical Specifications

Crushing Structure	Horizontal crushing structure
Material Compatibility	Pharmaceuticals, Chemicals, Foodstuffs, High Viscosity, Hard Materials, Soft Materials, Fibrous Materials

Design & Compliance

Design Standard

GMP Standard

Operational Features

- Simple structural design
- Convenient cleaning access
- Low noise operation
- Automatic exit flow via centrifugal force

Material of Construction	Stainless Steel
