

Industrial Coating Spray Booth System

This industrial spraying system is designed for coating applications. The system includes a booth with transparent curtains, a control panel, and an overhead conveyor.

System Overview

Industrial Coating Solution

This industrial spray booth system is engineered for efficient and contained coating applications in professional environments. It features a robust enclosure with transparent curtains to ensure safety and particulate containment. With an integrated overhead conveyor and a dedicated control panel, the system supports streamlined, automated, or semi-automated finishing workflows.

Key Features

Automated Operation, Overhead Conveyor, Containment Curtains, Control Panel Interface

Technical Details

Enclosure Material

PVC (Transparent)

Workpiece Transport

Overhead Conveyor

Control System

Integrated Electronic Panel
