

Industrial Coding and Marking Machine

This coding machine is designed for industrial packaging applications. It features a print head assembly, control unit, and mounting bracket for integration into packaging lines, ensuring precise coding and marking on packaging materials.

Product Overview

Industrial Coding and Marking Solution

This industrial coding and marking machine is engineered for precision labeling and packaging applications. It features a robust print head assembly with integrated rollers, a user-friendly control unit with a digital display, and a versatile mounting bracket designed for seamless integration into existing packaging lines. The system is built to ensure consistent and high-quality marking performance in demanding industrial environments.

Quality Assurance

Testing Equipment

- Three coordinate measuring instrument
- Hardness tester
- Impact tester
- Salt spray test machine

Quality Management Methods

PC, CPK, GR&R, FMEA
