Overview

Industrial Grinding Solution

This high-capacity industrial grinding machine is engineered for consistent and efficient processing of oil-rich materials, including coffee beans, sesame, peanuts, and almonds. Designed for continuous operation in demanding commercial environments, the machine features adjustable roller settings to achieve precise particle size distribution. Its robust stainless steel construction and user-friendly control interface ensure long-lasting reliability and ease of operation for large-scale production facilities.

Technical Specifications

Grinding Mechanism	Roller-based compression
Adjustable Grind Size	Yes
Compatible Materials	Coffee Beans, Sesame, Peanuts, Almond, Oil-rich materials

Performance Features

Key Operational Benefits

- Low noise operation
- High processing capacity
- Easy to operate
- Continuous feeding via hopper

Construction

Primary Material
Stainless Steel

Applications

Ideal For

- Commercial coffee production
- Roasteries
- Large-scale processing plants
