

Industrial Color Camera with Optical Zoom

This high-resolution industrial color camera is designed for demanding imaging applications. The camera delivers exceptional image quality and reliable performance with its robust construction and advanced DSP color processing.

Overview

Industrial Imaging Precision

This high-resolution industrial color camera is engineered for demanding imaging applications requiring reliable performance. It utilizes advanced DSP color processing to ensure exceptional image quality and precise color reproduction. Its compact footprint and versatile mounting options allow for seamless integration into diverse machine vision and quality control systems.

Technical Specifications

Processing Technology	Advanced DSP Color Processing
Design Characteristics	Compact Size, Robust Construction, Versatile Mounting

Applications

Suitable Applications

- Machine Vision
- Quality Control
- Industrial Imaging
