

# Industrial Compression Spring

Compression springs designed for machinery and industrial applications. These springs offer resilience and support.

## Product Overview

### High-Performance Industrial Compression Springs

These industrial-grade compression springs are engineered to provide consistent resilience and reliable support across a wide range of machinery applications. Manufactured to precise specifications, these components ensure optimal performance and structural integrity under load. Their robust design makes them suitable for demanding industrial environments where durability is critical.

## Product Identification

### Available Model Numbers

H1332Y, H1333Y, H1334Y, H1335Y, H1336, H1338Y

## Physical Characteristics

### Design Features

- Yellow finish for high visibility
- Precision-engineered coil design
- Versatile sizing for various machinery needs

### Application Compatibility

Industrial Machinery • General Hardware • Load Bearing Support
