

Industrial Computer Workstation

This industrial computer workstation features an integrated computer system housed within a robust cabinet. It is designed for data processing, monitoring, or control applications in industrial or laboratory settings, and includes a built-in monitor, keyboard tray and mouse space.

Overview

Industrial Computer Workstation

This industrial workstation is a robust, all-in-one solution designed for demanding environments. It features an integrated computer system housed within a secure, enclosed cabinet, ensuring durability and protection for internal components. With a built-in monitor, dedicated keyboard tray, and mouse space, it provides a comprehensive setup for data processing, monitoring, and control applications in industrial or laboratory settings.

Design & Build

Form Factor

All-in-One • Industrial Grade
