

Industrial Control Station with Rotary Switches

This industrial control station is equipped with rotary switches for manual control. An indicator light provides visual feedback on the system's operational status.

Product Overview

Industrial Control Station

This industrial control station is designed for reliable machinery operation and electrical system management. Featuring a robust enclosure, it includes two rotary switches for multi-position selection and a central indicator light for real-time status feedback. Its durable construction is ideal for demanding industrial environments requiring precise manual control.

Technical Specifications

Control Interface

- 2x Rotary Switches
- 1x Status Indicator Light

Mounting Type

Surface mount with corner screw fixation

Primary Application

Industrial Machinery, Electrical Control Systems
