

Industrial Conveyor Pulley

These pulleys are designed for stable performance and long operating life. They are suitable for use in dusty, wet, and muddy environments.

Product Overview

Industrial Conveyor Pulley System

These industrial conveyor pulleys are engineered for stability, high performance, and long operating life in challenging industrial conditions. They are specifically designed to function reliably in environments characterized by dust, moisture, and mud. Robust construction makes them an ideal choice for heavy-duty belt conveyor systems used in mining, quarrying, and bulk material handling.

Technical Specifications

Available Diameters

- 200
- 250
- 315
- 320
- 400
- 500
- 630
- 800
- 1000
- 1200
- 1250

Supported Conveyor Belt Widths

- 500
- 650
- 800
- 1000
- 1200
- 1400
