

Industrial Conveyor System

This industrial conveyor system is designed for efficient material transport. It features a robust steel structure suitable for use in chemical processing plants.

Product Overview

Industrial Conveyor System

This industrial roller conveyor system is engineered for the efficient transport of diverse goods, including boxes, bags, trays, and bulk materials. Designed for durability, it is capable of handling single pieces of heavy material or sustaining greater impact loads. It is an ideal solution for facilities requiring reliable material handling across various industrial applications.

Technical Specifications

Suitable Materials

- Boxes
- Bags
- Trays
- Bulk materials
- Small items
- Irregular items

Integrated Features

Elevated Walkways • Support Framework • Roller Conveyor

Load Handling

Heavy Duty, Impact Resistant

Structure

Robust steel structure
