

Industrial Cooling Conveyor System

This industrial conveyor system is designed for cooling products. It features a stainless steel construction with multiple cooling units and adjustable height settings.

Product Overview

Industrial Cooling Conveyor System

This industrial-grade cooling conveyor system is engineered for efficiency and hygiene in food processing environments. Constructed entirely from durable 304 stainless steel, it ensures a long service life and is designed for easy sanitation. The system features a sealed cowling with integrated electric fans to provide consistent cooling, along with a convenient dregs collection box to maintain a clean workspace.

Construction & Materials

Material	Stainless Steel 304
Design Features	Sealed Cowling, Dregs Collection Box, Electric Cooling Fans

Dimensions & Capacity

Key Dimensions

4000 mm

Length

770 mm

Width

1100 mm

Height

Filter Area

4000 x 500 mm
