

Industrial Cooling Fan

This cooling fan is designed for industrial applications requiring effective heat dissipation. It features a durable frame and efficient blade design, ensuring optimal airflow and reliable performance.

Product Overview

Industrial Cooling Performance

This high-performance cooling fan is engineered for demanding industrial applications requiring reliable thermal management. Featuring a robust, durable frame combined with a precision-engineered blade design, it ensures optimal airflow and efficient heat dissipation. Built for longevity and quiet operation, it is an ideal cooling solution for machinery, power electronics, and sensitive equipment.

Technical Specifications

Key Performance Metrics

120 mm
Frame Size

Core Features

High-Performance, Low Noise, Durable Frame, Efficient Airflow

Applications

Suitable For

- Industrial Machinery
- Electronic Equipment
- Heat Dissipation Systems
