Overview

Industrial Counterweight Solution

This industrial counterweight is engineered for heavy-duty applications requiring precise balance and stability. Constructed from high-density materials with a protective black coating, it offers excellent resistance to wear and corrosion in demanding environments. Its standardized design features a central mounting hole, making it ideal for modular systems in machinery and construction equipment where weight adjustment is critical.

Technical Specifications

Weight per Unit	54 kg
Finish	Corrosion-resistant black coating
Key Features	High-density material, Precision-engineered, Central mounting hole, Corrosion resistant

Logistics & Supply

Inventory Status

In Stock • Ready for Shipment

Packaging	Palletized and secured with metal straps
