

Industrial Crate Mold

This mold is designed for the efficient production of industrial crates. It is suitable for manufacturing plastic crates in various sizes and configurations.

Product Overview

High-Performance Industrial Crate Molds

These industrial-grade crate molds are engineered for high-volume manufacturing of durable plastic crates. Designed to support various configurations, including vegetable crates, disposable units, and double-sized crates, these molds ensure precision and consistency in production. Built with advanced materials like Moldmax, they are optimized for efficiency and longevity in demanding industrial environments.

Technical Specifications

Available Configurations

- 4-cavity crate mold
- 2-cavity crate mold
- Vegetable crate mold
- Disposable crate mold
- 600x400x320mm double crate mold

Material Technology

Moldmax 438, Moldmax 432, Moldmax 252, Moldmax 251, Moldmax 250

Dimensions & Capacity

Standard Mold Dimensions

600 mm

Length

400 mm

Width

320 mm

Height
