

# Industrial Crushing and Culling Machine

This industrial crushing and culling machine is designed for material processing applications. It features stainless steel components, a cyclone separator, and a collection hopper.

## Product Overview

### Industrial Crushing and Culling Machine

This industrial-grade crushing and culling machine is engineered for high-efficiency material processing and particle size reduction. Constructed with durable stainless steel components, the system integrates a powerful motor, cyclone separator, and collection hopper to ensure consistent output quality. It is an ideal solution for facilities requiring reliable separation and grinding capabilities.

## Technical Specifications

Model Identifier	ACM-05
Machine Type	Grinder, Crushing Machine, Culling Machine

## Construction & Design

**Material Composition**  
Stainless Steel

### Key Components

- Cyclone Separator
- Collection Hopper
- Control Panel
- High-Power Motor
