

Industrial Cutter Inserts and Tongs Set

Precision-engineered cutter inserts and tongs are designed for industrial applications. These components are manufactured from high-grade materials to ensure durability and longevity.

Product Overview

Industrial Cutter Inserts and Tongs Set

This precision-engineered set includes high-grade cutter inserts and robust tongs designed for demanding industrial applications. Manufactured for durability and longevity, the components are essential for machining, metalworking, and various manufacturing processes. The inserts feature a central aperture for secure mounting, while the tongs provide a firm, reliable grip for safe material handling.

Technical Specifications

Design Features

- Central aperture for secure mounting
- High-grade material construction
- Ergonomic, robust grip tongs

Included Components

Cutter Inserts, Industrial Tongs

Applications

Primary Applications

Machining • Metalworking • Manufacturing
