

Industrial Cylindrical Grinding Machine

This industrial grinding machine is designed for heavy-duty material processing. Its advanced control system ensures consistent and precise grinding results.

Product Overview

Industrial Cylindrical Grinding Machine

This industrial abrasive and grinding machine is engineered for heavy-duty material processing in demanding manufacturing environments. It features a robust construction with a large cylindrical grinding surface and an advanced control system to ensure consistent, high-precision results. Designed for efficiency, the unit includes an integrated conveyor system with multiple rollers, making it suitable for seamless integration into existing production lines.

Technical Specifications

Handling System

- Multiple rollers
- Conveyor system

Grinding Surface

Large cylindrical

Design Features

Modular Design, Heavy-duty, Precision Control

Safety & Compliance

Safety Equipment

Enclosed Housing • Emergency Stop Controls
