

# Industrial Diesel Engine

This diesel engine is engineered for diverse industrial and agricultural uses. Its compact form factor allows for straightforward integration into current setups.

## Overview

### Industrial Diesel Engine (CGZ12)

The CGZ12 is a robust diesel engine engineered for versatility in industrial and agricultural settings. Its compact architecture allows for seamless integration into existing machinery, including water pumps, generators, and small agricultural vehicles. Built for longevity and reliability, this engine features a high-efficiency air filter and a durable fuel injection system to ensure consistent performance and fuel economy.

## Technical Specifications

Model Designation	CGZ12 / SD25
Engine Type	Single-cylinder diesel engine

## Key Features

### Maintenance & Build

- Compact design for easy integration
- High-efficiency air filtration system
- Durable engine block construction
- Designed for long service life

Suitable Applications	Water Pumps, Generators, Agricultural Vehicles, Industrial Machinery
