

Industrial Diesel Generator Set

This diesel generator set provides a reliable and continuous power supply for industrial applications. It features high electrical efficiency, strong anti-interference capability, and class “H” insulation.

Overview

Industrial Power Solutions

This industrial diesel generator set is engineered for high reliability and efficiency, serving as an ideal prime or standby power source. Equipped with advanced engine technology and a high-performance alternator, it delivers consistent electrical output with low fuel consumption and minimal emissions. Designed for durability, the unit features class H insulation and a robust construction suitable for demanding environments ranging from telecommunications to industrial mining.

Performance Metrics

Power Range

20 kVA

Minimum Power

2500 kVA

Maximum Power

Operating Frequencies

50Hz, 60Hz

Technical Specifications

Key Features

- High electrical efficiency
- Low fuel consumption
- Low noise operation
- Low emission output
- Strong anti-interference capability
- Extended overhaul period

Insulation Class

Class H

Applications

Suitable Industries

Telecommunications • Hospitality • Healthcare • Commercial Buildings • Industrial & Mining • Retail
