

Industrial Diesel Generator Set

This diesel generator set is designed for low running costs with extended oil change intervals and a high-efficiency centrifugal oil filter. Its reliable design ensures a long overhaul life, making it suitable for use in trucks, buses, and generator sets.

Overview

Industrial Power Solutions

These industrial diesel generator sets are engineered for reliable primary and backup power applications. Featuring robust engine configurations ranging from 5L to 8V cylinders, these units deliver consistent performance across a wide power spectrum. Designed for heavy-duty operational requirements, each generator is built on a durable frame to ensure stability and ease of deployment in demanding environments.

Technical Specifications

Performance Capabilities

Model	KVA	KW	Engine	Weight
KH-200GF	250	200	DC9	2185
KH-220GF	275	220	DC9	2350
KH-240GF	300	240	DC9	2385
KH-280GF	350	280	DC12	2530
KH-300GF	375	300	DC12	2660
KH-320GF	400	320	DC12	2660
KH-360GF	450	360	DC12	2800
KH-400GF	500	400	DC16	3120
KH-450GF	562.5	450	DC16	3220

Engine Geometry

- 5L configuration: 127×140 mm
- 6L configuration: 127×154 mm
- 8V configuration: 127×154 mm

Efficiency

Fuel Consumption

195 g/kwh

Min Consumption

208 g/kwh

Max Consumption
